Description

SafeVideo Embed (Secure Video Integration for Joomla)

SafeVideo is a secure, lightweight and fully responsive video embedding solution for Joomla 5. It allows you to display YouTube, Vimeo, TikTok, Facebook, and local MP4 videos without exposing unsafe iframes or using heavy external scripts.

Engineered by the [JoomFlix engineering team](#), SafeVideo ensures that every embedded video follows a clean, sandboxed structure — offering improved security, consistent styling and flawless performance across all devices and templates.

? Main Features

- ? Secure video embedding without unsafe external iframes
- ? Supports YouTube, Vimeo, TikTok, Facebook, Dailymotion and local MP4 sources
- ? Automatic ratio handling (16:9, 4:3, vertical mobile video, etc.)
- ? Fully responsive player with adaptive scaling

- ? Lightweight rendering — minimal scripts, no framework dependencies
- ? Compatible with all major Joomla 5 templates
- ? Multi-language support (12 languages included)

? Why Choose SafeVideo

- ? Ensures safe and sandboxed video display on your website
- ? Eliminates layout breaks caused by TikTok, Facebook and iframe-based embeds
- ? Perfect for blogs, product pages, landing pages and documentation
- ? Extremely lightweight — optimized for Core Web Vitals
- ? No conflicts with SP Page Builder, Helix, T4 or other frameworks
- ? Includes JoomFlix License & Update Server for smooth updates
- ? Ideal for websites requiring clean, safe and stable video integration

SafeVideo Embed for Joomla 5

Secure, responsive and script-free video embedding for all major providers.
